

RAFTING ON RIVER TARA

TARA - "TEAR" OF EUROPE

Tara is the longest river in Montenegro (144km) which is consisted of two rivers Opasnica and Verusa and with river Piva from Scepan polje makes Drina. It has made one of the biggest canyon-valleys in the world which is long 80 km and high over 1300 metres.

River Tara is the famous one and in the recent time for rafting by rubber boats. During the month of June the categorisation of rivers by their level of attractiveness for rafting is carried out. Tara was marked by 3-4 (coming just after Colorado and other the most attractive rivers in the world which categorisation is up to 5). Thus it appears to be on the very top of the worlds famous rafting rivers according to its attractiveness and adventure it can provide.

We offer one-day, two and three-day rafting arrangements (packages) on the Tara River.

Three-day package includes rafting the "Splaviste" (stations 3 km upstream from the bridge to Djurdjevica Tara) and runs 95 km to Scepan Polje.

For this rafting our boats are provided. Our people know every stone and every swirl Tara and completely.

THREE-DAY PROGRAM RAFT THROUGH THE NATIONAL PARK

I day:

Departure is between 10 and 11 a.m. after breakfast, with a place called "Splaviste" or "other camp" 3 km upstream from the famous bridge on the Djurdjevica Tara. Already after 30 min. of navigation we going to Ljutice, extreme natural phenomena, the largest source in Europe. The whole river suddenly rises from the living rock to 200 m later, cold (3 - 40 C) and foaming at Tara instilled such great vitality to its full cut white jet stream of Tara. After 30 min. we find the monumental bridge on Tara, a masterpiece of architecture and architecture. Long 365 men its height of 150 m breathtaking as we sail under its arches.

Tresnjicki bukovi cascades are the first in which we encounter on our journey. Shortly after them, on the right side, a hundred meters away from the river is an ancient monastery of Archangel Michael. It was built in the fourteenth century, members of the fraternity Lekovica, whose descendants are still living in this place. The Turks destroyed the monastery to the ground in the nineteenth century pogrom in the village and restored in recent years thanks to the efforts of the local population. Buk Archangel is this excitement on our way, and immediately it began poslie "green virov. Holiday on the coast in the middle of the ancient giant trees surrounded by beech and oak trees. From this starting point after a long break that we passed a place called Adžikin buk, where we will once again test in overcoming Tarinih rapids. After Zugica port through the steep canyon to float about half an hour to arrive at Mušova springs from which water flows from the great distance from the slopes of Durmitor, and next to White Springs, which is reliably identified as a source of water from Black Lake in Zabljak. The water travels through the underworld of Durmitor 14 days, to the light, the sun appeared on this site.

Obodina is one of the greatest curvature at Tara with a great noise behind which lies a stone Lazin, the narrowest place in the canyon. At this place was Tara only 4 feet wide, and the rising steeply, so the sky above us only tanušna blue bar somewhere in height. Here is Tara and profound, and its depth exceeds 16 m. Ninkovic ports, lull after the brutal nature of the previous scene, where we can see, the right side of the canyon and Draga rivers coming from mountains Ljubisnja here and flows into the river Tara. Radovan port as we welcome our first port and place of our first rest. From the port of departure to Radovan we preplovili 38 km. The camp will spend the rest of the day in leisure activities (fishing, swimming, hiking through nature, etc.).

II day

Starting immediately after breakfast, around 10 a.m. and almost immediately we arrive to the village Tepca. The village is known for its old bridge wire, and also because it immediately after it, on our way Tepacki cascades are attractive for its rapids. Bajlovic sig place where the canyon is the deepest. Over 1,300 meters high and puts it in second place in the world, right after the famous canyon of Colorado. On the right bank of Tara are impressive tufa by the end of which gets its name. On top of them is a cave with an underground lake, which, because of the impenetrability and size are still unexplored, and it is assumed that extends far to the north of the River. The upper and lower Nozdruć the rapids that we will pass one another, and after they left us to follow the river canyon is a river that Susica phthisis, overflowing with spring and long, scooped out the roots of mountain Skrskih lakes which springs from the top of Durmitor.

K-2 RAFTING -Nikšić

Prodrta Usov, a large and attractive leads us in a whole series of cascades also attractive. The landscapes around us and take turns coming to the end of our day. After about 5 hours of navigation and driven over 40 km, we come to another camp called Brstanovica where we spend the night.

III day

Starting about 11:00 am, soon we find the longest in Tara, rapid Brstanovica. The rapid is extremely long compared to the other and it is possible for those who do not want to be exposed to this effort to organize transport by land to the end of the noise. Those who decide to stay on the boat undergo unforgettable and unique experience real "whitewater rafting" excitement. Follow us Borovi, another series of rapids, in many ways the most attractive on the whole our journey. The following is Celijski, and after him more and Upper and Lower Vjerinovica cascades that Tara has the highest decline, and many are beautiful. Now we finally follows a break in a peaceful way. We will soon arrive to a place Uzup. Here are the remains of the dam for the timber, which was used in ancient times, when Tara transported lumber. By the end our way we pass another series of cascades, five, six, which will help us carry through our three-day event. We arrive at Scepan field. But there is not the end of adventure. Before us is a canyon of Piva back with a tour of the dam (220 m high), in addition Piva lake (length 42 km), Piva Monastery (16 century).
